Completed

Albert Bielashov

JUNIOR QA ENGINEER

Detail-oriented QA Engineer with an active ISTQB® Foundation Level certification. I specialize in manual and functional testing, with a solid understanding of the Software Development Lifecycle (SDLC) and modern testing methodologies. My practical background includes analyzing requirements, designing test cases, executing regression tests, and tracking defects. I am a fast learner, highly adaptable, and a dedicated team player, eager to bring my analytical skills to a dynamic QA or Functional Analyst role.

Professional Experience

QA Tester & Mobile Developer

2024 — 2025

Sellpoint (Mobile E-commerce Team Project)

- Conducted manual testing and supported the development of a mobile e-commerce platform within a 5-member Agile team.
- Managed testing tasks, participated in sprint planning, and tracked software defects utilizing Jira and Trello.
- Executed comprehensive regression testing and participated in code reviews via GitHub to maintain code quality.
- Tested UI/UX components and complex purchasing logic to ensure a seamless and secure user experience.

QA Tester (Freelance / Contract)

12/2024 — 09/2025

Independent Game Studios

- Provided manual and functional testing for multiple interactive applications and PC games released on Steam (Castle of Secrets, CLOWNOUT, Fear Underground, CUBESCAPE).
- Conducted deep manual testing of system logic, core mechanics, and collision interactions within complex 3D environments.
- Wrote detailed, reproducible bug reports, tracked defect lifecycles, and collaborated closely with development teams to verify fixes.
- Executed regression testing on new software builds to ensure overall stability and prevent critical regressions.
